“Experience the Diode Difference”

Since the beginning of the LED revolution, Diode LED has been dedicated solely to delivering high-quality LED lighting solutions. We are a U.S.-based company, and design and engineer our core products in California to provide ever-higher performance and reliability. As we continuously improve the quality and capabilities of our LED lighting solutions, our passion for delivering superior products at affordable prices has never wavered.

Diode LED offers more options than ever. We have always felt that it is our responsibility to be your on-call experts. The variety of lighting solutions available to designers and installers, as well as home and business owners, is limited only by one’s imagination. We challenge ourselves every day to provide the highest level of support to help our customers meet their lighting challenges. Our in-house product specialists, and specification and project support team work together with engineering to make our products easy to understand, effortless to adapt, and simple to use, which is what we call “The Diode Difference.”

Our success is fueled by this perpetual commitment to you. We actively listen to your needs, and work relentlessly to improve product features, as well as our service offering. By customizing our products to fit your needs, the options are endless – and we are excited to explore these opportunities with you.

We know you will enjoy our latest offers featured in our comprehensive catalog, and invite you to:
